

RAIL-RAMMER IV

DIRECT IMPACTING LINEAR RAILCAR VIBRATOR

This Heavy-Duty Railcar Unloading Vibrator delivers a powerful, direct impact force output of 3400 lbs at 80 psi while only weighing 48 lbs. It is the highest-force, lowest-weight portable linear railcar vibrator available. The WORKMASTER® Rail Rammer IV provides the force required to prompt and maintain the free flow of even the toughest materials - sticky, coarse, and high in moisture.

BENEFITS

IMPROVE UNLOADING EFFICIENCY

Linear vibrator provides powerful force to boost material flow.

SAVE ENERGY

Air-efficient design operates on air supply from 45-95 psi (3.1-6.5 bar); consumes only 25 cfm at 80 psi (5.5 bar).

SMALL BUT POWERFUL

Compact vibrator and mount assembly design provides the power to unload even the most stubborn materials.

EASY TO HANDLE

Lightweight vibrator and shoe assembly makes mounting/dismounting a "no strain" procedure.

INDUSTRY-LEADING FORCE/WEIGHT RATIO

Produces 20% to 50% more force than other similar vibrators.

REDUCE INJURIES

Vibrator and wedge system weighs only 48 lbs (21 kg), reducing risk of injury from manhandling large, unwieldy vibrators into railcar brackets.

GUARANTEED PERFORMANCE

The RAIL RAMMER IV Vibrator is covered by a 3-year warranty against defects, workmanship, and materials.
