

BALL, ROLLER, PISTON & AIR MOTOR VIBRATORS RUN SMOOTHER, QUIETER - AND UP TO 3X LONGER!

THE ISSUE

Most manufacturing plants, processing plants, utilities, and contractors utilize pneumatic vibrators. The life and performance of these vibrators are essential to the productivity and operation of the plant. Slow running, poor performing, and shorter vibrator life destroy productivity gains made elsewhere. Inadequate lubrication is a major contributor to poor performance.

THE PROBLEM

Air contains moisture, dirt, dust and other contaminants that interfere with the proper functioning of air vibrators or any pneumatic equipment. Moisture exists in virtually all airlines due to relative humidity in the air and condensation caused by expansion and cooling of compressed air. Lubricants not specially formulated to operate in the presence of moisture can interact with that moisture to form sludge, rust, and gum. This is especially true for vibrators left in storage or not run for any length of time. Other contaminants can pass through the filter system causing varnishes and sticky substances to form in the vibrators and airlines, lowering vibrator performance. Lubricants such as hydraulic oils, motor oils, and penetrating oils commonly used in vibrators, are not designed for air systems, and cannot combat moisture and contaminants.

THE SOLUTION

WORKMASTER® VIBRA-LUBE™ Air Vibrator Oil is specifically designed for air vibrators. VIBRA-LUBE's special emulsifier absorbs 10% of its weight in water, preventing the formation of gum and sludge. Its base oil, unlike conventional oils, won't leave hard carbon deposits that rob Vibrator power. VIBRA-LUBE™ contains anti-wear and extreme pressure additives which provide additional lubrication for a Vibrator's moving parts, and its corrosion preventative component prevents rust that occurs in vibrators and airlines due to moisture carried in the air.

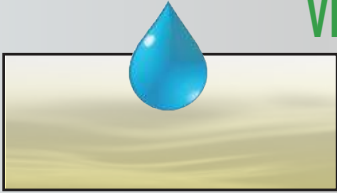

THE RESULT

With a few as three drops per minute of VIBRA-LUBE™ Air Vibrator Oil, you will gain the following advantages from your air vibrators:

- **MORE POWER**
- **CONSTANT SPEED**
- **REDUCED NOISE**
- **LONGER SERVICE LIFE**
- **REDUCED MAINTENANCE**
- **LOWER LUBRICANT USAGE**
- **STORAGE/IDLE TIME PROTECTION**
- **DECREASED TOTAL AIR SYSTEM COSTS**

VIBRA-LUBE

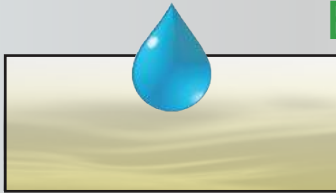

Stir a sample of water into VIBRA-LUBE

Watch it disappear!

BRAND "X"

Stir a sample of water into your current lubricant

The drop remains visible

PART #	
1 Quart	36-21020
1 Case (12 Qts)	36-21024

The WORKMASTER® line of unloading products, from our wide selection of gate openers and pneumatic pocket vibrators to our pocket to undertrack conveyor connectors, offers total solutions to the vexing problems of hopper cars.
