Not since the shift from metal to plastic has there been any reason to change to a better utility bucket – much less a safety reason! But all that's changed now that the bucket design has evolved. We have "Broken the Mold" (so to speak) with this revolutionary, patented Bucket design.

The **Perfect Pour Bucket** has accomplished what bucket users have always wanted: a handgrip on the bottom of the 5-gal pail. Adding this molded-in grip is a game-changing feature that greatly improves worker convenience, efficiency, and safety on any job. And not only does this one-piece, user friendly bucket work in any application currently using plastic buckets, but it's also cost competitive with the unwieldy 5-gallon plastic bucket you currently use.

The **Perfect Pour Bucket** can be used safely to store - and pour - paints, inks, chemicals, foods, construction materials, ice, pet foods and a range of other applications in industrial, agricultural, pharmaceutical, construction and commercial applications.

The **Perfect Pour Bucket** meets or exceeds every typical industry standard. It's made of high-density polyethylene (HDPE) and has a full 5-gallon capacity. The white plastic pail has an HD 90-mil wall thickness, reinforcing ribs for shape retention, and metal handle with plastic grip. Both the grey pail, metal handle, and its black cover lid are 100% recyclable and rated UN # 1H2/Y1.2/20/16. The white traditional press-on lid is sold separately.

## **BUILT-IN Grip!**

By adding a rigid, integrated handgrip at the bottom of the **Perfect Pour Bucket**, the risk of spills and other inefficiencies are reduced, and worker injury is all but eliminated. This patented design offers something no other bucket can...The Perfect Pour.

**NOTE:** Based on quantity custom colors and logo available

WE FIND A WAY — OR MAKE ONE!

*In a survey of Construction and Industrial workers who use 5-Gallon buckets: 71% rated the bucket safer and 78% rated its ability to pour "much better" than standard 5-gallon buckets.*

## KEY BENEFITS

- Molded-in bottom Handgrip
- Full 5-gallon (18.9 Liter) capacity
- Dimensions: 11.9" Dia (top) x 10.4" Dia (bottom) x 14.5 H
- Hot fill to 160°F, and can be steam sterilized and frozen
- Heavy-duty 90-mil wall thickness
- Reinforcing ribs guarantee it keeps its shape
- Metal handle with plastic grip for comfortable transport of heavy contents
- Stacks/nests like a traditional bucket
- UN/DOT Certified #2 HDPE
- Traditional press-on lid/cover sold separately
- Plastic and metal components are 100% recyclable
- Made in the USA
