VIBRATOR MOUNT BEAM KIT

Don't overlook your flow potential GET THE MOST USE OUT OF YOUR VIBRATOR!

The correct vibrator mount is clean, flat, tight and secure — and often overlooked! Unfortunately, the majority of vibrators never perform to their potential because of poor, ineffective mounting. With the **WORKMASTER® MOUNT BEAM KIT**, the necessary ingredients for the proper, safe mount are right at your fingertips! Incorporate a Mount Beam Kit into your bin vibration plans and see first-hand how a properly mounted vibrator transmits more vibration energy into the stored material, reduces vibrator maintenance, lowers noise levels, and eliminates safety concerns.

EACH KIT INCLUDES:

- Mount Plate / Beam with Pre-Drilled Bolt Holes to match the footprint of your specific vibrator, deburred edges for a clean, smooth finish
- 6' Long Safety Cable with Wire Rope Clips on each end
- Two (2) Heavy-Duty Weld-On Rings
- Two (2) 3M Rust & Scale Removing Pads
- Sure-Grip 3M Pad Holder
- Four (4) Grade 8 Hex Head Cap Screws with matched strength Elastic Stop Nuts
- Eight (8) Compression Washers
